The automatic e-mail service for cutting edge inventions from German research

TechnologieAllianz has developed a range of customer-oriented services to make German high-tech inventions available to start-ups, SMEs and large companies.

By offering **proprietary research results** to industry, TechnologieAllianz has tailored its **technology transfer** to the needs of businesses. Companies can build up on technologies and processes that are already patented.

Additionally, the **Invention Store** is now available free of charge. This service perfectly harmonizes the demand and supply for technologies. Using this new e-mail service, companies are immediately informed about the latest patented technology solutions with a proven business potential developed by German universities and research institutes.

This service is available in English and German.

Users of www.inventionstore.de can define their fields of interest and register it at the website. As soon as patent-protected technologies from the selected branches of industry are available for licensing or sale users will receive an e-mail with information on the invention automatically and free of charge. The portfolio of inventions grows every day.

A network of more than one hundred innovation managers with proven industry and market expertise is at your disposal to answer any question related to the inventions.

Our portfolio currently includes more than 2,000 patented inventions with a high business potential. Those high tech solutions represent inventions from almost all German universities and a variety of other research institutes.

About us

TechnologieAllianz is a modern sales partner for universities and R&D institutes and a competent business partner for industry. Members of TechnologieAllianz represent more than two hundred research institutions with over 100,000 scientists. This enables us to provide access to the entire range of inventions from German universities and other research institutes.

TechnologieAllianz offers a wide range of services for making inventions available to businesses, securing industrial property rights, and efficiently marketing R&D results.
